

## SERVICE OVERVIEW

# Tenable Managed Services

Explore the benefits of comprehensive vulnerability management services

With the proper support, managing vulnerabilities doesn't have to be a daunting task. Our expert-led Tenable Managed Services reduce vulnerability risks and improve your security posture. When you collaborate with NuHarbor Security, your team can focus on the most critical business objectives, while we optimize your Tenable platform.

## Eliminate the burden of vulnerability scanning on your team

With our comprehensive scan monitoring, meticulous policy management, and thorough asset coverage, we ensure peace of mind while maintaining your environment and delivering insightful reports. Our cybersecurity experts and accredited engineers offer timely advice to assist you in prioritizing and mitigating risks effectively.

“

NuHarbor has been a trusted partner for several years, supporting our vulnerability management practice. Their expertise in prioritizing which vulnerabilities to address first has been invaluable. By understanding our environment, NuHarbor has helped us identify and mitigate vulnerabilities, ultimately making us more secure.”

## Tenable Managed Services details

Our award-winning security experts extend the capabilities of your team to maintain your environment, monitor scans, and deliver meaningful reports. Our services include:

- 
- ### Vulnerability interpretation, analysis, and recommendations
- > Prioritized and comprehensive vulnerability assessments
  - > Results interpretation for a clear analysis of your most critical vulnerabilities
  - > Practical guidance, remediation, and compensating control recommendations focused on your unique environment and exposure

- 
- ### Health monitoring: configuration, development, and calibration
- > Continuous monitoring and management of the health and performance of your Tenable software
  - > Monthly scanning configurations to improve fidelity of scan results
  - > Assistance with onboarding new assets, creating new scheduled scans, and updating configurations
  - > Backend software management for expert handling of application layer upgrades, technical issue resolution, performance tuning, and general maintenance of the scanning environment

- 
- ### Reporting
- > Custom tenable dashboards
  - > Reporting tailored to your specific scopes and audiences
  - > Automatic or on-demand report delivery

Tenable Managed Services from NuHarbor Security offers you the expertise and support you need to navigate the complexities of vulnerability management. By partnering with us you can focus on what you do best—driving your business forward—while we help secure your digital environment.
