

Make cybersecurity easier

Simplify and strengthen your operations with cybersecurity services from NuHarbor Security. We combine expert analysis and advice with best-in-class technologies to deliver maximum protection. From hyper-growth startups to Fortune 500 companies, we've helped organizations at every stage and industry overcome security challenges.

Easy to understand

Our security experts are trained to support and communicate in ways you can understand. Cybersecurity solutions are created to answer your questions on your terms.

Easy to choose

We have an established reputation as security and technology leaders. With a clear definition of cybersecurity outcomes for your business, you can make the best decisions to secure your organization.

Easy to trust

We deliver clear and consistent communication. Paired with our trusted operations and reporting, your stakeholders can have peace of mind in their cybersecurity decisions.

About us

NuHarbor is a leading national cybersecurity services firm, supporting the diverse needs of hundreds of clients with clear, comprehensive, and outcome-based solutions. We deliver the most well-informed strategies for building, improving, and maintaining your security program.

- > Compliance, offensive testing, and award-winning 24/7 managed security operations
- > Nationwide presence
- > Best-of-breed technology integrations
- > 100% of staff based in the U.S.
- > Protects 1/3 of the U.S. population through efforts with state and local government

Critical solutions you need from experts you trust

NuHarbor integrates information from multiple telemetry sources to deliver holistic, targeted plans for building, improving, and maintaining cybersecurity programs. We strategically position technology with human expertise to create consistently successful outcomes and build trust with our clients.

Advisory and planning

Our experts leverage visibility across hundreds of clients and an expanding inventory of threats to provide custom and actionable advice on operations planning, incident response, and project prioritization.

Assessment and compliance

Understanding appropriate controls and configurations provides key information about adherence to internal and external policies. Whether to satisfy requirements of internal or industry audits, compliance services reduce the recurring burden of audit and assessment typically placed on an already overburdened security team.

Managed services

We work around the clock to ensure your critical security infrastructure provides maximal protection. We watch for new threats, sift through noisy data, and balance activity, impact, and urgency to deliver value.

Security testing

Our special operations team trains and tests with the latest tools and techniques used by the most effective and malicious bad actors, developing a clear view of vulnerability that can't be uncovered any other way.

Our Technology Partners

Cybersecurity services that solve your problems

Simplify and strengthen your security operations with proven services

No matter where you are in your cybersecurity journey, NuHarbor Security can help. Whether you're just beginning, looking to improve your security posture, or not sure where to go next, our trusted experts are committed to your success and can help you every step of the way.
